LBM Business

LBM, from zCore Business Solutions, Inc. (zCore), is a one-of-a-kind legislative management system designed specifically to address the many analytical needs of state and local government, corporations, associations, and lobbyists.

The management and distribution of key legislative information and the need to produce internal working documents related to such bills has become a critical task for organizations affected by pending legislation. The volatile nature of the legislative process and the increased amount of legislation introduced every new session has organizations struggling to combine these elements into a single platform. LBM, geared specifically to address these needs, has been developed on a web-based architecture using the latest available technologies.

zCore's LBM, provides an integrated platform by combining the proposed legislation and analysis process into a single, easy to use system. LBM can help your organization manage the legislative process, maximize your ROI, improve collaboration between key players, and quickly search for bills that might have an impact on your organization.

Using a proven collaboration and workflow platform, LBM provides a system for organizations to maximize their efforts during a Legislative Session. This platform also provides an industry leading security and the most widely deployed PKI (public key infrastructure), making it easier for your organization to control access to key legislative information.

zCore Business Solutions, Inc.

Vendor ID: 1141944554600

LBM is about enabling people and legislative resources –inside and outside you organization- to work together to support your legislative strategy. LBM will help you reduce costs, improve productivity and gain control of your legislative process.

LBM provides users with a means to manage bills as they make their way through the legislative process. More importantly, LBM is a platform on which users can collaborate with each other to analyze and create impact statements for each version of the bill.

LBM provides the following features and benefits:

Features

- ? Easy to Use – Intuitive Graphical User Interface (GUI)
- ? Collaboration – Quick 2-step Assignments to groups and analysts with auto notification
- ? Web Browser Accessible – Electronic forms for data entry of bill summaries, operational impact statements and fiscal impact statements
- ? Roll-up – Completed analysis documents merged into a final summary report
- ? On-line access – On-line access to bill text, bill history, bill analysis and other key legislative information
- ? Electronic Routing – Electronic routing capabilities for all analysis information within the system
- ? Security – Configure security at the server, application and document levels
- ? Document Control – Document Check In and Check Out
- ? Dynamic Sharing – Allow a team member to take control of your document
- ? Fiscal Note – Link Fiscal Notes to bills and/or mark bills as having a Fiscal Note request
- ? Configurable – LBM is configured according to your organization’s legislative process

Benefits

- ? Linkage – Unique method of linking internal analysis processes to key legislative actions and documents
- ? Centralized Repository – Key legislative information including all versions of the bill text and associated analysis
- ? Easy Access – Quick and easy access to key legislative information on-line
- ? Paper Reduction – Significant reduction in the amount of paper distributed
- ? Improved Communication – Improvement in the communication links between management and staff
- ? Improved Turnaround Time – Quickly assign and retrieve bill analysis

LBM Enterprise

LBM Enterprise includes a law implementation management module called LIM. LIM is an add-on module to LBM. This module provides an organization the ability to take legislative that has been passed into law, and creates projects that track the implementation of those laws that have fiscal or business impact to their organization.

LIM provides the following functionalities:

- ? Projects
- ? Create and manage projects to track the implementation of one or more laws
- ? Assign primary and backup managers to a project
- ? Assign primary and backup managers to project tasks and deliverables
- ? Give non-team member read access to project information
- ? Law Association
- ? Associate laws or sections of laws to a project
- ? Provide links to final analysis and final bill text
- ? Notification
- ? Configure notification per project
- ? Automatic notification to assigned resources
- ? Automatic notification to resources of project status changes
- ? Application configuration
- ? Configure keywords to reflect your organization
- ? Configure required field in project forms
- ? Configure default notification settings

Maintenance, Repair and Support Plans

zCore will warranty LBM for thirty days. In addition, zCore will provide support for "Critical Failures" throughout the term of the Texas Legislative session, plus 20 days at the support cost stated in the catalogue. A "Critical Failure" is complete inoperability of the application due to the design of the application. Warranty and "Critical Failure" support will be void if modifications are made to any part of the LBM by any party other than representatives of zCore. In the event that traditional application or network support is needed at any time, zCore will offer its services at a specified state catalogue rate. If application specific training is necessary, zCore will offer services at specified state catalogue rate plus any expenses that may be incurred for the training session.

Statement of Guarantee: zCore will make available equivalent replacements parts available for a product sold to the state for at least 3 years after a product is discontinued.

Products	State Unit Price	List Unit Price
VDoc License (Maintenance Included for 1/Year)	\$31,900.00	\$39,900.000
VDoc Maintenance (Maintenance After First Year)	\$5,100.00	\$6,380.000

In order to protect and grow market share in a fiercely competitive global marketplace, today's small-and medium-sized business (SMBs) must out-perform the competition at every turn. And that requires not only constantly improving your offering of products and services, but also using all of your resources as efficiently as possible. In doing this, you will make the most of your potential for performance and maximize every dollar you invest. In support of these objectives, your IT department is probably already working as hard as it can to provide your staff with the applications they need to do their individual jobs as quickly, easily and effectively as possible. And they are no doubt investing additional effort in ensuring that individuals have the sophisticated collaboration and communication tools they need to work together in a secure, streamlined manner to keep the business running smoothly — profit margins rising steadily. But there is more that can be done. Putting the responsibility for developing business process-driven applications in the hands of the people that are most familiar with the best ways to carry them out ensures that they will do exactly what they need to do.

And this can create strength in the organization from the ground up by:

- ? Shortening operational cycles to enable faster decision-making
- ? Enforcing effective policies and procedures for better operations
